

General Conditions:

- All NDC's related to geotechnical drilling and site clearance should be obtained before commencement of the drilling.
- The Laboratory company must comply with all the health and safety precautions at the site.
- Excavation of trial pit must be done manually at a suitable depth in the places of the boreholes to ensure that the site is clear from the services.
- All field and laboratory tests should be carried out under the supervision of the soil engineer and consultant representative.
- Backfill of boreholes by cement-bentonite after completion of the drilling or with impermeable material that closes the hole completely.
- Soil testing laboratory, consultant and contractor are responsible for any potential risks that may occur in the future due to the site condition.
- Approved Soil Report should be submitted by the consultant upon submission of structural drawings approval.
- Failure to comply with the above conditions will void this permit.
- I, the undersigned, hereby guarantee the accuracy of the attached documents, information, drawings, calculations and technical reports.
- The accuracy and quality of the final soil investigation report is under the project consultant responsibility.
